

Restylane®
redefining beauty™

Instant and
long-lasting
wrinkle
correction.

www.RestylaneUSA.com

Q What is *Restylane*®?

A *Restylane* is a safe and natural cosmetic dermal filler that restores volume and fullness to the skin to correct moderate to severe facial wrinkles and folds, such as nasolabial folds.

Q What is *Restylane* made of?

A *Restylane* is the first and only cosmetic dermal filler made of non-animal-based hyaluronic acid. Hyaluronic acid is a natural substance that already exists in the human body and is used to provide volume and fullness to the skin. The hyaluronic acid in *Restylane* is a crystal-clear gel called NASHA,TM or Non-Animal Stabilized Hyaluronic Acid. NASHA is biodegradable and completely biocompatible with human hyaluronic acid.

Q How is *Restylane* different than other hyaluronic acid-based products?

A Unlike other hyaluronic acid-based products, such as those made from rooster combs, only *Restylane* is non-animal-based. This quality virtually eliminates any risk of animal-based disease transmission or allergic reaction.

After

Treatment with two *Restylane*® 1.0 mL syringes

Individual results may vary

Q Is Restylane® safe?

A Yes. *Restylane* has been used safely by dermatologists and plastic surgeons since 1996 worldwide. Because *Restylane* is non-animal-based and fully biocompatible, allergy testing is not required. There is virtually no risk of animal-based disease transmission or allergic reaction. The most commonly reported side effects were temporary redness and swelling at the injection site. These effects typically resolve within two to three days.

Q How long does Restylane last?

A Studies have shown that the average treatment results last up to six months or even longer. The unique NASHA™ technology helps maintain the cosmetic effect until the injected material is nearly gone.

Q How is Restylane different from Botox®?

A *Restylane* is a natural, cosmetic filler. In contrast, Botox is a drug that blocks nerve transmission and relaxes the underlying muscles. Many patients have been very pleased after receiving treatment with both products.

Now that you have the answers to some important questions, why wait?

If you want to enjoy a smoother, more youthful appearance for up to six months, or even longer, ask your physician if *Restylane* is right for you. The simple procedure can be done during your lunch hour. And the effects are immediate.
